

Rivendell Winery Traffic Study 2006

The following table is derived from meticulous records of numbers of sales and traffic counts. The *average* stay time for a customer is 30-40 minutes. The table shows traffic count two ways; 1) the total cars per day divided by the total open hours of the tasting room (8 hours) and 2) the more realistic traffic pattern based on the percentage of hour and therefore customers for each hour as evidenced by the small table to the right. For forecasting purposes, each method of tabulation is shown increased by 50% and 100% respectively to show what tasting room traffic growth could be like. The number of cars parked per hour can be increased for any day by 4-5 to account for the parking of employee vehicles, however, that parking will be in a separate location from the public parking.

The Site Plan calls for a total of 30 natural parking spaces and an additional 65 temporary spots on the edge of the roadways. In 2006, traffic would have needed the additional overflow parking on just 6 days, and only by a few cars at a time (maximum 14 additional cars on one October day). These days are highlighted in **BOLD**. If the business increases a reasonable 50%, the planned 30 parking spaces will be fully utilized only 13 days per year necessitating a maximum of 34 additional spots on one day in October. At 100% business growth (an extremely unlikely figure) the spaces would be fully utilized only 32 days per year. It should be noted that any of this additional parking need is only for one or two hours per day. Additional parking can be created in several areas on the property for up to another 50 - 60 cars if needed. As it is, the planned overflow parking of up to 65 spots along the side of the driveway will more than accommodate extra-ordinary needs, and with very little to no environmental impact.

| Tasting Room Sales Rate | |
|-------------------------|------------------|
| Hour | Sales % Of Total |
| 10 | 4.38 |
| 11 | 7.40 |
| 12 | 9.66 |
| 1 | 13.12 |
| 2 | 15.64 |
| 3 | 15.61 |
| 4 | 15.65 |
| 5 | 12.79 |
| 6 | 5.75 |

Easter Egg Hunt

2007 count was 64 cars at once - entire event takes place in 1 hour's time. We have run this event for 6 years and the attendance is quite static. It is not anticipated that our new location will substantially increase these numbers although a growth has been shown.

Lobster Fest. This is by far our biggest event which we have put on for 12 years. It is an annual catered event with pre-sold tickets. Total attendance in 2006 was 475 people representing approximately 225 cars. The seating times dictate the traffic flow. There are 5 seating times; 1pm, 2pm, 3pm, 4pm and 5pm. If 225 cars are all parked according to seating time (i.e there were no other customers that day) the maximum cars parked at any one time would be 45. Adding the additional natural business 42 cars over the course of the 8 hour day puts the maximum parked cars at 48.

Wreath Fineries at 10 Wineries Tour along the Shawangunk Wine Trail. This is also a pre-sold ticketed event. The maximum number of parked cars is well established and spread fairly evenly over the day. The only increase will be to the Sunday tickets which cannot exceed the numbers of currently established Saturday tickets.
